WITH THE FARMERS

By Prof. W. F. MASSEY

not grow tall, and I grazed it some.
Now I wish to get the land in peas.
Is there a way that I can put it in peas and let the clover remain and make parture next summer? Could grow a wish to get the land in peas.
It was the peas and let the clover remain and make parture next summer? Could grow and put in the peas and let the clover remain and make parture next summer? Could grow and put in the peas and let the clover remain and make parture next summer? Could grow and put in the peas and let the clover remain and make parture next summer? Could grow and put in the peas and let the clover remain and put in the peas and let the clover remain and put in the peas and let the clover remain and put in the peas and let the clover remain and put in the peas and let the clover remain and put in the peas and let the clover remain but it is very uncertain, and the clover so of our of phosphoric acid.

With a proper rotation of crops, and there were the grow in the form of phosphoric acid. With a proper rotation of crops, and the provision of the Underwood bill, except to still the summer of form the provision of the Underwood bill, except to still the sum of property in a good retation, and grow in the clover grow of our of our control of the provision of the Underwood bill, except to still the sum of property in a good refer than the namure and put in the peas and let the clover grow of our of phosphoric acid.

With a proper of alton of crops, and there were grow of the grow of the soil will stocked with the provision of the Underwood bill, except to still the sum of the free part and colored matter, and there we can go four of most of most of the provision of the Underwood bill beaching sugar might be regarded to grar and there we sugar still beach in the peas and clot the clover peas and that is needed to most order the provision of the Underwood bill beach in the peas and clot the provision of the Underwood bill beach in the peas and clot the provision of the Underwood bill beach in the peas and clot the clover peas

way to get both peak and clover.

Letture Varieties.

That after success last winter with the Big Boston better out of the composition of the granitic rocks. But this is in a very insolute state and the two know what better the did of complete commercial formation of the granitic rocks and the two grow under cloth in winter and the large state of the sandy considered that the sandy is grant to grow under cloth in winter and the large state of the sandy considered that the largest heads and is best to grow under cloth in winter and the largest heads and is best to grow under cloth in winter and the largest heads and is best to grow under cloth in winter and the largest heads in specific rocks will have to use potash white the formation of which is an average of the sandy coarse of the sandy coarse of the largest heading petitice is ine better under glass earlies the largest heading lettuce is ine Wonderfull. But it is not a good variety for winter, but will mine very largest heading lettuce is ine Wonderfull. But it is not a grow variety for winter, but will mine very largest heading lettuce is ine Wonderfull. But it is not a grow variety for winter, but will mine very largest heading lettuce is ine Wonderfull. But it is not a grow variety for winter, but will mine very largest heading lettuce is ine Wonderfull. But it is not a grow variety for winter, but will mine very largest heading lettuce is ine Wonderfull. But it is not a grow variety for mineral will be seen that the farmer of particular and the largest heading lettuce is included and the largest heading lettuce is included in a will be defined an account in the largest heading lettuce is included an account in the largest heading lettuce is included the lime. The largest heading lettuce is included the lime with mineral will be seen that the farmer of particular and the large will be seen that the farmer of the winter of the will be seen that the farmer of the will be seen that the farmer of the will be seen that the farmer of the will be seen that the

blut, all the same if it will stand the winter with son it will stand the winter with you, for the finest field I saw last year was down in your section, and he winter with you it will make year was down in your section, and any companies the soli inoculated. The time son clover if you keep at it regularly and get the soil inoculated. The time will grow crimgs is the only way to run it out.

W. P. Minsky I was deded to the free bits of the weeks will clean it through the your life of the weeks will clean it will make the blooms show, and my to prevent its several times, and if it winters well you can cut it three times the next season. Down in Mississippi they cut if four times. By being can be the week will dean it would move off the howkeed as soon as the blooms show, and my to prevent its several times, and if the week will dean it would move off the howkeed as soon as the blooms show, and my to prevent its several times and years. Professor Warren, or Committee on good rotation of crops, and formers and to the real trouble with the soil is so poor for grow conditions. The second is the week will dean it out. Need and would not be much revision in the carbon more grass seed, and mowing of the weeks will dean it out. The week will dean it out. Need and keep the weeks mown off a pasture, and decomplish that clover need and keep the weeks mown of a pasture, and decomplish that clover for the weeks will dean it out. Need and keep the weeks mown off a pasture, and decomplish that clover needs man who complains that clo will stand with you, for the finest field I saw last

who keeps his land poor and ignores and early very schedule except cotton."

Fertilizing Corn.

Will it pay to apply 160 pounds of intate of soda an acre down the national top dressing of bone meal and an application of the grass by annual top dressing of bone meal and an application of time once in six years.

Yill to pay the to use Farmogerm to incollate the seed of clover and vert when I can get well-inoculated soil by houling it two miles? It will est less to had the soil, and will be equally effective if you spread the soil and after the soil and after the soil and any seed and at once disk if in to preven the soil and after the soil and any seed when I can get well-inoculated the soil and will be equally effective if you spread the soil at the tate of a barriel or more an scre, and at once disk if in to preven the soil and after th

other plot, this one turning under of organic matter had enabled the soil to retain moisture, and the fertilizer was dissolved and a fairly good crop, of potatoes made. Heavy fertilization will always pay best on land well sup-plied with human.

Size of Sign 7¹₂ in. x 5¹₂ in.

Your choice of one of these three signs with every cash order for SEVEN insertions of a Want Ad, no matter what the classification.

This offer does not apply to telephone orders.

The illustrations opposite are exact reproductions of the signs. They are of glass, waterproofed on the back so that the lettering will not run even though the sign is exposed to the weather. Lettering is in bold black type, clearly

The glass part of the sign is framed in a brass chain, with loop at top, with which it may be suspended. The signs are attractive in appearance, dignified and in good taste. They may well be considered an ornament, and cannot be passed by without attracting attention.

By Mail, Add 10c to Cover Cost of Mailing

WILSON TO ATTEND WEDDING

Secretary McAdoo's Son to Be Married To-Morrow.

Washington, June 20.—Secretary McAdoo, of the Treasury Department, this afternoon went to Baltimore to attend the wedding of his son, Francis H. McAdoo, and Miss Ethel Preston McCormick. The ceremony is to be held at 4 o'clock to-morrow afternoon at Brookland, a suburb of Baltimore. The bride is a native of Baltimore. President Wilson, it is expected, All grace the occasion with his presence. Several members of the Cabinet may also attend. A special train is to take the presidential party, including those of his advisers who will make the trip.

NEW WIRELESS SERVICE

With United States.

Christiania, Norway, June 20.—The committee of the Norweglan parliament to-day unanimously recommended approval of the contract arranged between the Marconi Company and the Norwegian government providing for a wireless service between Norway and America if certain modifications can be obtained. Obtained.

Under the contract the Norwegian government is to spend \$500,000 in the erection of a station at Stavanger which will be connected with a station at Boston.

CROWN CLOSES CASE.

slaughter.
Dr. M. Merritt, the crown's principal witness, agreed with Dr. H. H. Moshier that the clot of blood on McCarty's brain had been caused by the blow. The crown to-night closed its case until witnesses for the defense have been heard, after which the prosecution will present witnesses in rebuttal. When adjournment was taken indications were that the trial would not be concluded before year. These

concluded before next Tuesday

SEX INSTRUCTION NEXT. Lectures Authorized for Information of Chicago School Pupils.
Chicago, June 20.—Instruction in matters of sex for high school pupils has been authorized by the Board of Education, and Elia Flagg Young, superintendent of schools, and a number of physicians well versed in the problems of hygiene and physiology will be secured for a lecture course.

The superintendent stated that the elementary schools need such instruction, but did not believe that the time is due when that phase of the question should be taken up

Remarkable Christmas Present

Among the curious Christmas presents of this year will be one for a man of national reputation, which has been all year in the making.

Way last January the present was decided upon, and a friend of the prominent gentleman requested the Burrelle Press Clipping Bureau, of New York, to watch every name in America and

to watch every paper in America and to take up every item hich appeared concerning the man.

The clipping bureau people followed

The clipping bureau people followed instructions, and now present the history of one year in the life of this especial man.

The history ends just after election, and the 20,642 newspaper items found include everything, from a three-line editorial mention to full-page illustrated stories. These have been many trated stories. These have been me

volumes.
At the head of each item is the name and date of paper clipped from, this information having been put in with a

book typewriter. The words thus in-serted amount to 158,962.

of which has been kept, the work has required sixty-four working days throughout the year, and has kept in employment during that time thirty people as readers, clippers, sorters, mounters and binders. Every nowspaper of importance is represented.

This is merely a specimen of some of the migne orders which sat between the unique orders which get into the Burrelle Bureau, for the extent to which dippings are used by individuals and by business concerns seems to be remarkable.

It Holds Pelkey Responsible for Death of McCarty.

Calgary, Alberta, June 20.—Medical evidence tending to show that Luther McCarty died in the prize ring May 24 as the direct result of a blow to the jaw administered by Arthur Pelkey was presented by the crown to-day at the
